How would you describe your overall internship experience during your final year of faculty?

I would say that my internship was an incredible experience. I had the opportunity to take on many interesting tasks and collaborate with colleagues from different departments, making it highly dynamic.

What were your main responsibilities during your internship, and how did they align with your expectations?

My main responsibility was providing administrative support to my colleagues, which helped me understand the workflow. I also got to be involved in various stages of more complex processes that I encountered later in my work. This gave me practical experience and exceeded my expectations, as I handled more challenging tasks than I thought I would.

How did the internship help you develop new skills, both professionally and personally?

The internship provided me with valuable knowledge in this field and helped me realize that this is the direction I want to pursue, as one of the biggest challenges during my final year of studies was deciding on the right career path. On a personal level, I became more adaptable and confident in handling new challenges, which has been essential for my growth.

How did you manage the demands of your internship while keeping up with your final-year studies?

I would say that it helped me organize my time much better, as I had to balance significant commitments on both sides. I learned how to stay focused and create a productive schedule for myself, which ultimately enhanced my efficiency in both my studies and the internship.

What advice would you give to current students who are about to start their internship or who are looking for one?

In my opinion, internships are a great way for young people to get familiar with their chosen field and gain useful knowledge. They provide a rewarding opportunity to work directly in the industry. I would encourage students to be proactive and get involved, as well as to feel comfortable asking questions. This will help them learn more and make the most of their internship.

If you could go back and change one thing about your internship experience, what would it be?

If I could go back and change one thing about my internship experience, it would be to take more initiative in seeking out additional projects or responsibilities. While I learned a lot, I think being more proactive would have allowed me to gain even more insights.
